## Sprint Information

- **Project Name:** Lab Equipment Knowledge Hub
- **Customer Name:** Zeth Danielsson
- **Sprint Goal:** Maintainers can delete users and types. Application is reviewed from a security perspective. Code is linted and relevant components have unit tests.

## Backlog

| ID | User / Technical Story | Size | Acceptance Criteria | Notes |
|---|---|---|---|---|
| 136 | As a maintainer I want to manage the returning of the equipment so that I can document faults, state of equpment kits, and mark the equipment as available again. | M | ☐ Only maintainers can return equipment.<br>☐ Returning equipment sets `returned_at` cell in the database.<br>☐ The unit is available to borrow again. | |
| 156 | As a maintainer I want to delete users so that they cannot use the app anymore. | M | ☐ Only maintainers can delete users.<br>☐ Deleted users are not able to log in.<br>☐ Deleted users are visible in the users list. | Not actually deleted, just a `deleted` flag in the database. Don't tell GDPR. |
| 157 | As a maintainer I want to delete types so that they don't clog the UI. | M | ☐ Only maintainers can delete types.<br>☐ Deleted types are not visible in the types list.<br>☐ Orphans are moved to the Unsorted type. | Not actually deleted, just a `deleted` flag in the database. |
| 162 | Technical story. Hardening the app where needed. | XL | ☐ Students can't use the maintainer functions, even if the UI is manipulated so that the elevated UI is exposed.<br>☐ Forms and server actions reject all invalid data. | |
| 163 | Technical story. Testing and linting the app where needed. | XL | ☐ The project's linting checks pass.<br>☐ All unit tests pass.<br>☐ A test coverage report is generated.<br>☐ The report shows at least 75% coverage of code considered suitable for unit testing, if the test framework allows setting up testing scopes. | |

## QA

This sprint focuses on reducing technical debt and will function as a base for future quality assurance. Code will be linted, relevant components will be unit tested, and the application will be reviewed from a security perspective.
